

Insurance Policy for Coastal Eye Care

As a courtesy to our patients who do not have vision insurance, Coastal Eye Care files with health insurance for the medical portion of the exam when there is a medical diagnosis. Please present all insurance information, both medical and vision cards (Eyemed or VSP), at the time of your exam if you would like for us to file your insurance. Insurance information provided after the date of service may not be filed retroactively.

The refraction (the part of the exam that determines the vision correction) is covered by most vision insurance. However, it is generally a non-covered service by health insurance. The fee for the refraction is \$45.00. That, along with the insurance copays, must be paid on the date of services rendered. Thank you!
